Capability Statement

WHY CHOOSE WMA SCAFFOLDING

EXTENSIVE EQUIPMENT INVENTORY

Rapid deployment with minimal lead times across all project scales

UNCOMPROMISING SAFETY CULTURE

Industry-leading compliance, supported by continuous training and regular audits, Ezicheq digital reporting and monitoring, and ScaffSafe anti-tamper systems

ARCHITECTURAL SENSITIVITY

Seamless access solutions tailored to high-end residential and architecturally designed commercial projects

10,000 TONNES KWIKSTAGE SCAFFOLD

3,000 TONNES FORMWORK/ FALSEWORK SCAFFOLD

PROVEN TRACK RECORD

Award-winning projects, repeat clients, and trusted long-term partnerships

TAILORED PROJECT SOLUTIONS

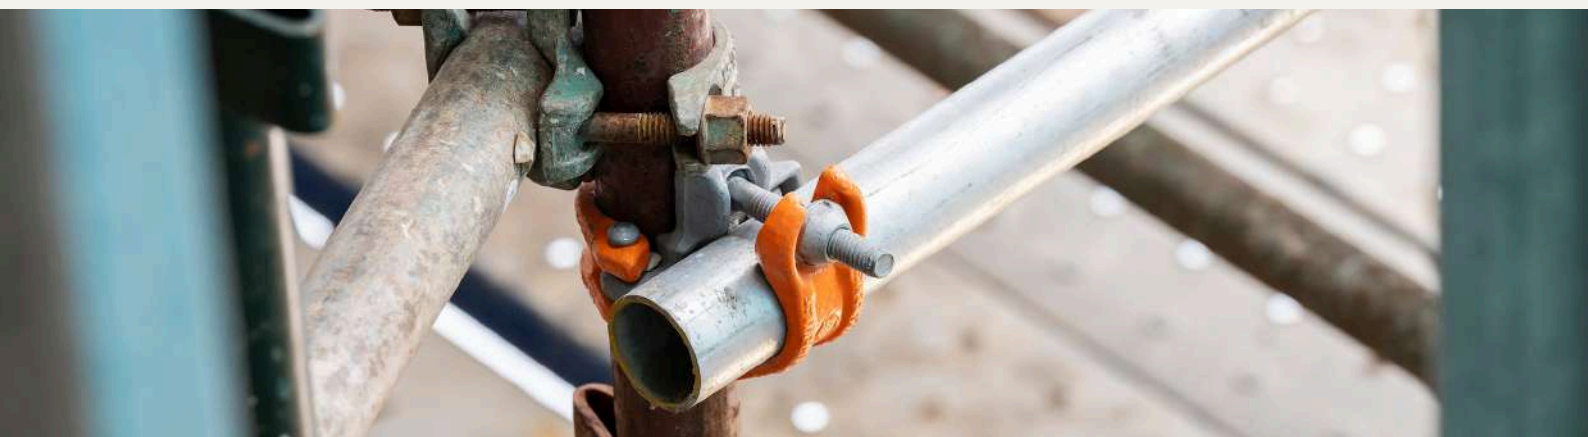

Engineered scaffolding strategies aligned with your design and construction program, combining early contractor involvement, collaborative planning and technical expertise

POWERFUL LOGISTICS FLEET

10 heavy-rigid trucks with rear mounted forklifts and 3 heavy rigid crane trucks

1,000 EQUIVALENT TONNES ALUMINIUM SCAFFOLD

EDGE PROTECTION & VOID PROTECTION SOLUTIONS

Capability Statement

SAFETY & COMPLIANCE

At WMA Scaffolding, safety is not simply a requirement—it is embedded into every stage of project planning, installation, inspection, and dismantling. Our commitment to protecting people, assets, and project outcomes drives every decision we make on site.

OUR SAFETY COMMITMENT

PLANNING

Every scaffold solution is assessed for project-specific hazards and site requirements before works commence

PREVENTION

We identify and control risks before they become incidents through detailed planning, inspections, and continuous monitoring

TRAINING

Our workforce receives ongoing training to maintain the highest standards of safety, competency, and compliance

ACCOUNTABILITY

Safety performance is measured, audited, and continually improved through digital reporting systems and site-based leadership

Licenced and qualified scaffold workforce

ISO 9001, 45001, 14001 accredited

Comprehensive Safe Work Method Statements (SWMS) & risk management documentation

EziCheq digital safety auditing & reporting system

Daily pre-start inspections & toolbox meetings to reinforce safe work practices

scaffSAFE anti-tamper system

Ongoing first aid & safety training for personnel

PPE compliance and proactive incident prevention strategies

Capability Statement

PROJECT South Yarra

This commercial development on Avoca Street required a full-perimeter scaffolding solution to support the construction of a multistorey building. Working in collaboration with Henny and the award-winning Pandolfini Architects, WMA Scaffolding delivered and installed a tailored scaffold system using both Kwikstage steel and aluminium components to suit varying access needs across the façade.

Capability Statement

PROJECT Yarraville

This residential development in Yarraville, VIC showcases the precision and capability of WMA Scaffolding's full-perimeter access solutions. Partnering with Balmain & Co and renowned architect Six Degrees Architects, our team supplied, designed and installed a comprehensive Kwikstage steel and aluminium scaffold system to support the construction of this high-end residential development.
